

# CECE 2020

The 4th Int'l Conference on Environmental Chemistry and Ecotoxicology (CECE 2020) will be held from July 24-26, 2020 in Guilin, China. This Conference will cover issues on Environmental Chemistry, Ecotoxicology, and other related topics. It dedicates to creating a stage for exchanging the latest research results and sharing the advanced research methods in related fields.

## CALL FOR PAPERS

C o n f e r e n c e D a t e : July 24-26, 2020

V e n u e : Guilin, China

R e g i s t r a t i o n D e a d L i n e : July 24, 2020

### Topics of interest for submission include, but are not limited to :

Chemistry and Control Technology of Air Pollution  
Chemistry and Control Technology of Water Pollution  
Soil Pollution and Remediation, Solid Waste Disposal  
Environmental Biology  
Ecotoxicology and Health Effect  
Nano Environmental Effect  
Theoretical Environmental Chemistry and Environmental Models  
Sample Pretreatment Technology  
Methods and Standards of Environmental Analysis  
Environmental Mercury Contamination  
Pollution Control Chemistry and Green Chemistry  
Environmental Chemistry of Isotopes  
Environmental Education  
Environmental Management and Policy  
Chemical Transfer Release and Environmental Exposure  
Physical, Environmental and Health Hazards of Chemical Substances  
Ecological and Health Risk Assessment of Chemicals  
Chemical Environmental Management Technology  
Environmental Management of Toxic Pollutants  
Environmental Exposure and Biological Absorption of Chemical Pollutants  
High-throughput Screening Methods for Chemicals  
Methods of Ecological Toxicity and Toxicology  
Testing of Chemicals  
Ecotoxicology and Ecological Risks of Chemicals  
Molecular Toxicology of Chemicals

## Publication and Presentation

Publication: Open Access Journal.

Index: CNKI and Google Scholar

Note: If you want to present your research results but do NOT wish to publish a paper, you may simply submit an Abstract to our Registration System.

## Venue

Located in the northeast of Guangxi Zhuang Autonomous Region in south China, Guilin is considered to be the pearl of China's thriving tourist industry on account of the natural beauty and historic treasures. Covering an area of about 27,800 square kilometers (10,734 square miles), the city is rather compact when compared with other major tourist cities in the country. The stunning landscape in which the city is situated has a kind of magic that is all its own. The strangely shaped hills or karsts, with the verdant vegetation ranging from bamboos to conifers together with crystal clear waters and wonderful caves make the city such an appealing destination. It is also an important cultural city with a history of more than 2,000 years. The city has been the political, economic and cultural center of Guangxi since the Northern Song Dynasty (960-1127).
